

Regulating Utilities for the Benefit of All

**PUBLIC NOTICE** 

## NET BILLING PURCHASE PRICE OF ENERGY

The Office of Utilities Regulation has determined that the rate payable by JPS to the customer for energy supplied to the national grid from the customer's renewable energy facility shall be at the short term variable avoided cost of generation plus a premium of fifteen percent (15%) allowed for Renewable Energy. The short term variable avoided cost represents the short run marginal cost of generation, which reflects the cost of fuel used for power generation on a monthly basis. This rate is expressed on a per kWh basis by dividing the total fuel cost for a given month by the net system generation for the same period. Based on the data and invoices submitted the rate is computed as follows:

Net Billing Purchase Price of Energy for the month of March 2013			
Item/ Sub-Item/ Component	Symbol	Unit	Amount
Energy Payments:	Epi	\$JA	2,865.13
Total Fuel Cost (JPS & IPP)	TFC	JA\$'000	6,333,524
System Net Generation (JPS & IPP)	SNG	kWh	338,104,901
Energy Output (kWh) from Qualified Facilities	EOmi	kWh	133.00
System Net Generation Net of Supplier		kWh	338,104,768
Short Term Avoided Cost		JA\$/kWh	18.732
Short Term Avoided Cost including 15% Premium	SACmi	JA\$/kWh	21.542
Billing Exchange Rate	IER	JA\$/US\$	98.8865
