

# HUDSON HOLLISTER

- Began his career as a securities litigator at Latham & Watkins and has a law degree from Northwestern University.
- Founder and CEO of HData, a technology company which uses analytics and Artificial intelligence (AI) to automate regulatory work, starting with the energy industry.
  - ***Customer base includes the nation's largest utility and pipeline companies and five state governments.***
  - ***The HData Platform ingests regulatory data*** and creates analyses and models which change automatically as new reports are filed.
- Founded the nonprofit Data Coalition which actively pursued efforts to transform many government reporting regimes from disconnected documents into open and standardized data.
- Previously served as an attorney at the U.S. Securities and Exchange Commission and on the staff of the House Oversight Committee.
